Racial and ecological reconciliation
Propose to create an avenue of conversation among the environmental community based
on the experience being done in racial reconciliation. We want to bring the work of racial
reconciliation to bear on the work of environmental reconciliation
Doing that by:
-   Find established work that does a good job of bringing the spiritual aspects to our
    responsibilities and complicities
-   Use that to bring us to the same conversation about environmental exploitation,
    genocide, species-cide, etc.

To use the experience of racial reconcilation born of our exploitation of slaves.. and
bring that to bear on our related exploitation of the land

-   Energy around this topic
-   Addressing the gap
-   Need partners –
-   developing curriculum
